

TESTING AND TECHNICAL ANALYSIS SOLUTIONS

AEGIS.NET INC.

The ITES-2S program is a performance-based, indefinite delivery/indefinite quantity (ID/IQ) contract that will help the U.S. Army and other federal agencies acquire innovative, standardized, turnkey solutions and services. AEGIS delivers complex business and information technology solutions, and is partnering with EDS, an HP company, to deliver a robust, software testing and technical analysis solution for ITES-2S.

A E G I S

Business challenges

Government agencies, such as the U.S. Army, are employing performance-based contracting approaches to addressing real information technology-based business issues. The Army needs trusted partners who can transform business and technical requirements into highly scalable, powerful solutions, ensuring all goals are achieved and all risks mitigated.

stated goals with frequent, planned communication throughout the project lifecycle. We rely on our PMI-certified PMPs, and our Rational, Sun, Microsoft and Mercury Inter-active certified staff to draw on their combined business and technical leadership experience, averaging more than 15 years, as well as on our partners, to ensure our mutual success.

What you can achieve

- Program efficiency and transparency through the support of Trusted Advisors
- Project risk mitigation and improved levels of quality assurance
- Detailed and comprehensive requirements gathering expertise
- Validated service level agreements (SLAs) and performance measures
- Comprehensive analysis and deliverables designed to ensure on-time project/task completions and budgetary compliance
- Significant contributions in writing OMB 300 Circular support documentation

An overview of AEGIS' capabilities includes:

- Independent Verification and Validation (IV&V)
- Comprehensive systems analysis and design
- Load and stress testing (Mercury Interactive partnership/certifications, Mobile Test Lab)
- Enterprise applications architecture
- Custom applications development (J2EE and .NET platforms)

Trusted Advisors to the NRC, VA and Commissioned Corps

AEGIS has been responsible for a broad range of high-end IT analysis and design, IV&V, and modernization and transformation leadership at the U.S. Nuclear Regulatory Commission, for the Department of Veterans Affairs MyHealthVet program, and to the Office of Public Health Service Commissioned Corps. Our in-depth experience has allowed our clients to reduce project risk, improve communication, and ensure systems usability, functionality and performance through:

- Support with the entire change request lifecycle
- Development and execution of functional and performance test plans
- Performing formal technical audits and IV&V reviews of software release candidates
- Collecting, organizing, and reporting earned value information.

Developing formal business cases, which include needs, requirements, alternatives, and operations concept analyses, as well as formal project management plans. These documents are used to support OMB Exhibit 300 submissions.
