

BUSINESS AND IT SOLUTIONS

PATRIOT TECHNOLOGIES, LLC

The ITES-2S program is a performance-based, indefinite delivery/indefinite quantity (ID/IQ) contract that will help the U.S. Army and other federal agencies acquire innovative, standardized, turnkey solutions and services. Patriot Technologies, LLC delivers complex business and information technology solutions, and is partnering with EDS to deliver robust solutions for ITES-2S.

ABOUT PATRIOT TECHNOLOGIES, LLC

Patriot Technologies, LLC is a Service Disabled Veteran Owned Small Business (SDVOSB) that provides superior IT services and consistently delivers results. Patriot Technologies helps federal agencies and large primes meet their small business and socio-economic contracting goals. Our distinctive solutions help organizations continually improve their performance while reducing operating costs. Since its inception, Patriot Technologies has played a vital role in offering innovative technology management solutions to client organizations to help them keep pace with the rapid evolutions in technology while maximizing their investments. Our distinctive solutions respond to the challenges all organizations face to continually improve their performance while reducing costs.

Business challenges

Government agencies are seeking to leverage existing infrastructures while they migrate to enterprise-wide systems. They are under pressure to develop business cases that will maximize their return on investment and increase levels of functionality while decreasing operating costs. Agencies are facing cultural changes: changes from stand-alone systems to enterprise systems, learning how to get the most from performance-based services, and budget cuts that impact resources.

A trusted IT services provider and business partner can deliver performance-based services that leverage existing resources; keep business operations flowing smoothly; gather the data needed to build business cases; develop performance measurements to standardize vendor requirements and optimize system performance; and provide support for system design and development that includes software, Voice over Internet Protocol (VoIP), Web-enabled applications, database development and support.

How we can help

Patriot works with your agency to determine your needs in IT services, systems operation and maintenance, and network support. The strength of Patriot's capability is our agility and flexibility in augmenting existing infrastructures and expertise in delivering performance-based services that meet your requirements. The result: improved capabilities and decreased operating costs. Patriot's proven expertise is already delivering success to several Department of Defense programs, including the Army's ITA program at the Pentagon.

What you can achieve

IT Services

- Performance-based configuration and capacity management services
- Quality-controlled, performance-based computer-aided design, engineering and management
- Cost-effective, performance-based computer systems administration, management and maintenance
- Innovative design and specifications for information systems and dissemination
- Safe, secure, cost-effective data and/or media management services
- Experienced DODAF-based operational and system architecture design and development
