

## PROJECT-LEVEL SUPPORT WITH A SINGLE POINT OF CONTACT

### Total Information Processing Support Services (TIPSS-3)

The TIPSS-3 multiple agency contract provides sources of information processing support services to government agencies. EDS pulls it all together with the right team and a single point of contact. We bring our proven experience and capabilities delivering end-to-end IT solutions across all TIPSS-3 requirement areas.

Prism Inc.  
Reliable Integration Services Inc.  
SiloSmashers Inc.  
System Quality Corp.  
Verizon Federal Network Systems, LLC  
World IT Solutions Inc.  
World Wide Technologies Inc.

#### Business challenges

Government agencies at all levels face the same issues. They must do more with less as financial and human resources increasingly diminish, even as the demand for improved functions grows. The need for data security and privacy is essential, as well as a more effective way of managing important documents and records. A trusted information technology partner can help agencies achieve efficiency and streamlined processing support services.

#### How we can help

EDS has participated on all TIPSS contracts, with a long, successful track record providing services under government wide acquisition contracts (GWACs) and indefinite delivery/indefinite quantity (ID/IQ) contracts. We engage a diverse team of partners including 8(a) small disadvantaged businesses. We have served government clients around the globe for nearly 40 years with outstanding results. We help government agencies modernize business practices and aging systems, while leveraging new technologies and best practices. Our core competencies directly match our government clients' IT needs. We do more, more effectively and efficiently, delivering the most value for agencies.

#### What you can achieve

- Features single point of contact for all project-level support
- Provides ease of use for the three TIPSS-3 requirement areas
- Supports mission-critical needs with technical excellence in application development
- Speeds delivery of task orders through wide range of available services
- Enables achievement of Capability Maturity Model Integration (CMMI) Level 5
- Brings innovation and thought leadership that delivers state-of-the-art technologies
